

Linde Supplier Code of Conduct

Introduction

Linde is a leading global industrial gases and engineering company, committed to making our world more productive. Our goals extend far beyond simply what we do, because how we do things is equally important, recognizing that we have ethical and social responsibilities. At Linde we take these responsibilities seriously and expect the same from those that we do business with.

Expectation

Suppliers, Contractors and third parties (“Suppliers”) play a critical role in Linde’s ability to operate and provide products and services to its customers.

Suppliers actions and practices also reflect on Linde. Therefore, the company chooses Suppliers carefully based on merit and a due diligence process. Linde expects Suppliers to comply with legal requirements and to act in a manner that is consistent with Linde’s values and the principles outlined in its Code of Business Integrity.

This Supplier Code of Conduct (“Supplier Code of Conduct”) defines Linde’s minimum requirements for our Suppliers concerning their responsibilities towards Linde and its stakeholders, societies and the environment.

As part of the standard documentation for all new and renewing contracts, Suppliers must confirm conformance with this Supplier Code of Conduct and with Linde’s Code of Business Integrity or equivalent policies of their own.

Linde is committed to maintaining long-term relationships with our Suppliers where they contribute continued business value. Certain Suppliers are audited on a planned schedule and on a broad scope. If deviations are discovered, Linde is committed to work with Suppliers on remedies through capacity building, education, and training. Continued, severe and/or willful non-conformance are grounds for contract termination.
